Message from the **Board President**

In 2020, Surrey Homelessness & Housing Society (SHHS) continued to work towards our vision that ***Everyone in Surrey has a Home***. We continued to move forward with our strategic priorities to Grow, Grant and Lead, and like many organizations, we adapted our strategies in 2020 in response to the impacts of COVID-19. We would like to take this opportunity to recognize the operational adaptations that Surrey's service providers and our community partners in the homelessness and housing sector had to make in 2020 – thank you for your essential work keeping our most vulnerable citizens safe.

In 2020, SHHS quickly pivoted our annual grants program to respond to the intensified health and safety risks arising from COVID-19 and the challenges facing our unhoused community members, those at risk of becoming unhoused, and the organizations providing direct services to those individuals. In the spring, SHHS granted $250,000 to 19 projects in support of the urgent response efforts to deploy safe food and meal programs, purchase safety equipment and basic needs supplies, and provide critical services to help people connect to housing and stay housed.

In consideration of the continued and evolving impacts of the pandemic, SHHS provided a second round of grants in the fall. $350,000 was granted to 11 projects that supported people to maintain housing, connect to food and other essential needs, and stay safe.

On behalf of the SHHS Board of Directors and staff, I would like to thank SHHS' 2020 grantees and Surrey's service providers for their tremendous contributions, innovative collaborations, and vital work providing services on the frontlines.

In October 2020, we launched our annual Public Awareness Campaign during Homelessness Action Week. The purpose of our campaign is to highlight local issues of homelessness and inspire public compassion, understanding and support. In 2020, the theme was centered on community togetherness to help Meet the Need for Surrey during this uniquely challenging time. The campaign's public communications focused on the immediate community needs emerging from the pandemic and the disproportionate impacts on people experiencing and at risk of homelessness.

We know the SHHS grants make an impact, and we recognize that the longer-term social and economic impacts of the pandemic on marginalized communities continue to evolve. We also know that there is a continued requirement for safe, stable, long-term, and supportive housing options in our community. We will continue to partner with community organizations in support of Made in Surrey solutions that make a difference in the lives of people experiencing or at risk of homelessness in Surrey.

To all our partners, grantees, donors, and friends, thank you for your dedication and the positive impact you make in our community.

Sincerely,
Councillor Laurie Guerra, Board President

SURREY Homelessness & Housing SOCIETY

2020 annual report

Highlights of 2020

We've granted **over $7 Million** to projects and initiatives in Surrey.

For more on these stories and other news, please visit, **surreyhomeless.ca**

Major **Contribution**

B&B Contracting has been a long-time supporter of SHHS and recently renewed their commitment by pledging another $100,000 over 5 years. This is their second 5-year pledge, and we would like to thank them and acknowledge their generosity and continued support of our vision that Everyone in Surrey has a Home. Their donations make an impact on homelessness in Surrey and contribute to the over $7 million SHHS has granted to over 150 community projects, programs and initiates since 2007. We would like to thank B&B Contracting for their tremendous contribution.

Meet **The Need**

The SHHS Public Awareness Campaign is one of our major annual initiatives that launches in October during Homelessness Action Week. The focus of the campaign is to bring awareness and understanding to issues of homelessness in Surrey and underscore that homelessness is a human issue that impacts everyone in the community. In 2020, the campaign's public communications addressed the challenges being intensified and the immediate community needs arising from COVID-19. The campaign encouraged community togetherness to help Meet the Need for Surrey. We continue to see the impacts of the pandemic evolve and disproportionately impact marginalized communities. Surrey has the second highest population of people experiencing homelessness in the region. There were 644 unhoused individuals identified by the 2020 point in time count that occurred just prior to the pandemic, with Indigenous people continuing to be overrepresented. The count provides an estimate and benchmark to measure progress and trends over time, however, it is widely recognized as a snapshot of the situation and does not represent those who are not visible, such as people who are struggling and not accessing services, people experiencing hidden homelessness or those at risk of homelessness.

Community **Leaders**

Every year, SHHS recognizes extraordinary community members who go above and beyond to make an impact in their community by supporting people experiencing or at risk of homelessness. In 2020, SHHS acknowledged the inspirational work of three key members of the Fraser Health Leadership Team at the Emergency Response Centre:

- **Sherif Amara**, Clinical Operations Manager
- **Tina MacDonald**, Site Clinical Lead
- **Manpreet Chahal**, Site Clinical Lead

During the emergency onset of the pandemic in the spring, there was a major concern of outbreak in Surrey's unhoused population, and several collaborators moved quickly to prioritize the health and safety of these individuals. In partnership with BC Housing, Surrey Urban Mission Society (SUMS), Fraser Health and the City of Surrey, the Emergency Response Centre (ERC) was opened at the North Surrey Recreation Centre to create safe spaces and shelter for individuals experiencing homelessness. Together, Fraser Health, BC Housing and SUMS formed a collaborative force providing coordinated and integrated services.

Health services that had not previously been provided to guests in the shelter system were brought to the ERC. Fraser Health introduced its first Managed Alcohol Program onsite, an innovation which would not have happened without the guidance of Sherif, Tina, and Manpreet. They were on the frontlines of the pandemic, putting the health and safety of others as a priority before their own. Demonstrating remarkable caring, compassion, creativity and community building, these three leaders went above and beyond to provide health services for unhoused people staying at the ERC.

SHHS would like to thank Sherif, Tina and Manpreet for their outstanding contribution.

COVID **Grants**

At the onset of the COVID-19 pandemic in the spring of 2020, SHHS pivoted quickly, engaged with the community and adapted our grants program in response to the immediate needs. As the pandemic evolved, SHHS launched another call for proposals in the fall to provide additional grants in response to emerging needs. A total of 30 initiatives were supported and $600,000 was granted. With these grants, organizations deployed food and meal programs, provided essential needs support, purchased health and safety equipment and supplies, and boosted staff capacity and housing sustainability programs. Thank you to our grantees and Surrey's service providers for their crucial and continued work supporting people experiencing and at risk of homelessness during this time.

Responsive Grant - **$3.9 Million**

In 2020, SHHS granted $3.9 million over 10 years to the City of Surrey to support necessary lease and renovation costs for three projects along the continuum of housing: The Cove shelter, The Olive Branch shelter, The Nest (Newton Modular Housing Project).

- The Cove is operated by the Surrey Urban Mission Society. It opened in November 2019 with 42 shelter beds to provide indoor shelter for individuals living in an outdoor encampment.
- The Olive Branch is also operated by the Surrey Urban Mission Society. It opened in November 2020 with 46 shelter beds to accommodate the people who were temporarily staying in the COVID-19 Emergency Response Centre (ERC) at the North Surrey Recreation Centre.
- The Nest is operated by the Phoenix Society. It opened in August 2021 with 40 supportive housing units, 16 of which will be designated as supportive recovery units for those who have recently completed a treatment program and are at risk of homelessness.

GROW

We partner with donors to help them make the most impact with their donations.

- schools
- families
- community based businesses
- corporations
- individuals

GRANT

We partner with Surrey based organizations and non-profits.

- capacity building and research projects
- women's transitional homes
- homelessness prevention
- healthcare initiatives
- shelters
- recovery homes
- youth outreach
- drop-in centers
- supportive housing

LEAD

We partner with the sector to develop and implement strategies that work.

- BC Housing
- Government of Canada
- Vancity Community Foundation
- Surrey Poverty Reduction Coalition
- City of Surrey
